

PP200CR MPM Premium Ceramic Paste Pressure Pack

Document version: November 18th 2018

Description

This ceramic paste is a highly versatile construction paste in a pressure pack with a unique double-piston system which is ready for use.

Due to the special composition of the paste, it is suitable for a temperature of up to 1400 °C. The paste provides good corrosion protection and is free of metal particles, being the perfect assembly paste for screw joints of different materials such as steel bolts and aluminum.

This ceramic paste is suitable as assembly paste for components and applications that are exposed to very high temperatures such as: ABS systems, brake parts, exhaust components, (glow) spark plugs, (flange) connections of furnaces in the steel industry.

Also applicable as a thin lubrication film for low sliding speeds and very high load, high wear, oscillating movements and vibrations.

Not to be used as roller bearing grease or ball bearing grease.

Packing units

ART. NO.	VOLUME	ITEMS PER UNIT	ITEMS PER PALLET
PP200CR	0.2 L	6	1020

Typical characteristics

TEST	VALUE
Basis	ceramic
Consistence	paste
Colour	White
Application temperature	5 – 35 °C
Temperature resistance as paste	-20 – 150 °C
Temperature resistance as ceramic solid	-20 – 1400 °C
