

## APPLICATIONS

Temporary tyre repair.

## CUSTOMER ADVANTAGES

- It seals the holes and allows the tyre to re-inflate instantly.
- Intended for both tyres with inner tube and tubeless tyres. It allows to carry out the operation without disassembling the tyre. It can be easily washed with hot water before the next tyre repair.
- It does not cause damage or corrosion as it settles on the inside of the tyre, automatically sealing the hole. Not suitable for large holes or tears.

## CHARACTERISTICS

Properties	Method	Unit	Typical
Density at 20°C	ASTM D 1122	kg/m <sup>3</sup>	670
pH	ASTM D 1172	-	9.0

## HANDLING INFORMATION

- Remove puncturing object (nails or other sharp objects).  
Place the tyre with the valve on top. Deflate the tyre.  
Shake the can well before use.  
Screw fitting firmly onto tyre valve.  
Holding can upright, press button to fill tyre and continue until tyre is inflated.  
Unscrew fitting and close valve.  
Immediately start the car and drive at moderate speed to allow the product to spread inside the tyre.

As soon as possible deflate tyre totally and refill tyre with compressed air to the prescribed pressure.
